ECE492 Capstone Design I
Assignment #2
Elements of Good Teaming Exercise

Working individually, write a one page, double spaced report in which you discuss the elements of good teaming, such as resolving conflict, conducting self-evaluation, and providing leadership. Cite at least three references you use in researching and writing your report. You may use the lecture material from the class as one reference.

For your references, use the IEEE Transactions, Journals, and Letters Information for Authors document in determining the reference format, order, and the procedure for referring to the reference in the body of your report.
